An Outstanding Reference Series

Advances in Enzyme Regulation

Volume 18

Proceedings of the 18th Symposium on Regulation of Enzyme Activity and Synthesis in Normal and Neoplastic Tissues, Indiana University School of Medicine, USA, 1979

Editor: **G Weber,** *Indiana University School of Medicine, USA*

Independent Opinion of a Previous Volume

"Most contributions give a broad view of the problem, an extensive introduction to former work, and a clear presentation of the data . . . addresses itself to the beginner and the experienced worker in the field."

Nutrition and Metabolism

This series concentrates on subjects which have reached the stage of productive summarization and critical evaluation in the light of extensive new results. The book also lives up to its goal of advancing a few steps ahead of much of the research in mammalian enzyme regulation.
